TYPOPHARMA.

pre-press workflow

Image brochure | English version

COMPANY HISTORY

Typopharma GmbH, a well-established prepress service provider, can look back upon a long tradition. Founded in 1971 – at a time when lead typesetting was still common practice for text creation and processing – „typotechnik Erich Weber“ was one of the first companies in Europe to work with a phototype platesetter for large amounts of data.

In 1988, desktop publishing was introduced. In 1996, we became pioneers with our PDF based workflow for the pharmaceutical sector. Since 2008, we have been predominately operating in this area. Our clients include well-known global players of the pharmaceutical industry. The knowledge and expertise we acquired due to this cooperation over the years enables us to deliver a high standard of production **quality for all industries.**

Our quality standards, specially customized for the pharmaceutical market, put us in a position to recognise risks at an earlier stage and to safely realize your requirements according to your needs and specifications. Due to our broad experience, we are able to offer a wide range of expert knowledge and profound know-how within the automation environment. Furthermore, we supply solutions even for complex and individual requirements - from clients like research based pharmaceutical companies, generics manufacturers, makers of medical devices and over-the-counter medications, branded companies or the contract-packing sector.

We focus on trusting client relationships and always keep calm and centered in this fast-moving service sector.

TYPOPHARMA. WE STAND FOR PERFECTION.

Apart from visual impact and readability, we guarantee production reliability of all business processes, especially in the area of packaging material and technical documentation. What we offer to our customers is a complete package from the first idea to the finished print product.

Centralized Data production is our key service – from text-heavy leaflets, outserts or brochures to technically sophisticated folding boxes, blister foils and tube printings.

In addition, due to our cooperation with strong partners we have created a **comprehensive spectrum of services**, fully covering all your requirements: Upon request we are able to take over the whole production process for you, including the necessary communication with authorities and suppliers – saving you time and costs. For example, in the area of medical writing or translation services we securely integrate the delivered textual material into our workflow, taking into account the document formatting.

PROFESSIONAL ARTWORK CREATION FOR ALL TYPES OF PACKAGING

Whether blister foils, tube printings, labels, folding boxes, leaflets or brochures – with us you will find high quality and long-term experience in creating all your artworks.

Our extensive portfolio comprises automated solutions for standardized packaging creation as well as individual design consultancy and realisation, tailored to your complex and technically demanding requirements.

In order to increase the success of your product and to strengthen its position on the market, we place special emphasis on branding and quality. Tools and formatting scripts developed in-house allow us to accurately apply delivered format markups and tags. For complex layouts we provide a pool of templates based on your design guidelines in order to fully meet all your corporate identity and branding requirements.

ALL YOUR PACKAGING. ALL ALONG THE PACKAGING LIFE CYCLE.

Technical drawings are elaborated in great detail and in close consultation with packers and printers.

We also offer high detail quality in the field of foreign language typesetting. Besides all Latin, Greek and Cyrillic alphabets, we are able to supply editable text in almost all Asian languages.

A web based lifecycle management system provides a platform that allows our customers to collaborate, supported by a diligent process documentation to ensure highly productive operations. The client can actively execute one or several sub-processes, such as order entry, processing of a checklist, or PDF comparison. Thus, the client has the full overview of all the workflow steps at all times. Alternatively, Typopharma may take over part of the processes or even the whole workflow. In this case, we simply inform the client upon completion.

副作用

罕見的病例會有乳房腫脹感、胃部不適、噁心、頭痛、體重增加、子宮出血的情形。

SUCCESSFUL QUALITY MANAGEMENT

We make sure to pay full attention to quality. A significant challenge for us is the efficient and accurate realisation of your products. We take your requirements and your need for quality very seriously.

High product quality requires a systematic quality management. Since 2008, we have been DIN EN ISO 9001 certified.

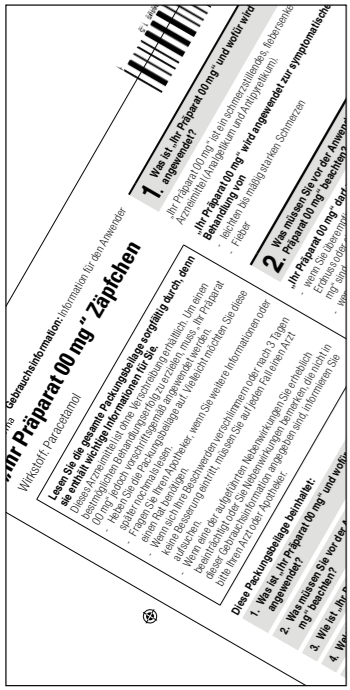

This builds trust among our clients and our employees.

With our error ratio going towards zero, a high level of customer satisfaction as well as the throughout positive feedback from customer audits, we can prove our competence in active and successful quality management.

ZERO-DEFECTS PRINCIPLE & 100% QUALITY. FIRST TIME RIGHT.

The ISO 9001 certificate, awarded by DQS, shows our partners that we have a well-established quality management system in place, creating transparency in our business processes and ensuring and continuously optimising the quality of our products and workflows.

OUR DIVERSITY OF SERVICES ACROSS THE PACKAGING LIFE CYCLE

Our company has the necessary expertise in the technologies, services and processes required for the pharmaceutical industry.

Therefore, we know that it takes more than pure typesetting services. We accompany you during the entire packaging management life cycle – with our expertise and with competent partners:

**OUR VISIONS.
OUR VARIETY OF SERVICES.
YOUR ADDED VALUE.**

- ▶ **Medical writing, language adaption & translation** for all European languages and the US – technically precise and also comprehensible for non-professionals
- ▶ Readability studies and optimisation of leaflets according to **EMA Readability Guidelines**
- ▶ **Corporate Identity (CI) and Corporate Design (CD)** – handy solutions for tasks in all areas and for all packaging material. Mockups and master documents for new product lines and templates compliant to your CI
- ▶ **Product photography and 3D modelling:** high-quality, efficient, flexible and cost-effective
- ▶ **Flexible artworks** – while creating your print artworks, we focus on them being fully editable and easy to correct. Thus, we can fall back on existing content, and modifications can be carried out quickly and securely
- ▶ **Workflow Management** Software – tailored to your requirements we handle your product information and digital assets securely and comfortably
- ▶ **Automated Publishing/Web-to-Print** – user-friendly web interface for entering text modifications. Quick implementation of all your changes in existing templates and creation of ready-to-print PDF documents
- ▶ **Security Solutions** – intelligent tamper-evident protection against counterfeiting. Whether recognisable, visible or invisible – together with you we develop the ideal solution.
